

EnterpriseOps-Gym

Key Features

Extensive Enterprise Focus

1150 tasks across 8 core domains

Live Sandbox Environment

Fully interactive, Dockerized environment.

High-Quality Data

SME-authored task constraints, policies and ground-truth plans.

Robust Eval

Outcome-based SQL state verification

Tested Skills

Multi-Step Agentic Planning

Resolving long-horizon tasks with strict state dependencies.

Policy & Constraint Adherence

Respecting strict access policies.

State-Driven Tool Calling

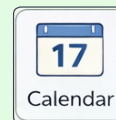

Choosing, parameterising the right API

Cross-Domain Orchestration

navigating multiple domains and tools while maintaining context.

User Request and Policy

Check case CS-0000644 (Windows Server 2022). Attach the correct KB article if missing, then email a solution proposal to the customer.

System Policy: used_as rule for KB attachments

① Automated search → "suggested"

② Found useful after resolution → "resolution"

③ Otherwise → "applied"

Hidden Task: Figure out email from case record

Agent Execution

① `search_cases(number="CS-0000644")`

② `find_case_knowledge_linkages(case_id=644)`

③ `retrieve_knowledge(product_id=1, state="published")`

④ `link_case_knowledge(case_id= ..., used_as="resolution")`

Policy: automated retrieve_knowledge call → must use "suggested"

⑤ **Unable to send email, missing email identifier**

Oracle: case.contact_id → find_contacts → list_users → email

Verification

✗ [FAIL] Link Case Knowledge

```
> SELECT COUNT(*) AS result FROM case_knowledge \
WHERE case_id = 644 \
AND knowledge_id = 1 \
AND used_as = 'suggested';
```

✗ [FAIL] Send Notification

```
> SELECT COUNT(*) AS result FROM notifications \
WHERE case_id = 644 \
AND knowledge_id = 1 \
AND type = 'solution_proposal' \
AND email = 'robyn.jacobs@jonesandreyans.com';
```
